# The Signature 5000 Performance Verification Kit

## What you'll need

To verify that your Signature 5000 is operating correctly, you'll need the items shown in this table.

Item	Description/Explanation
Cirris Signature 5000 Cable Analyzer	This is the cable analyzer you're about to check for correct operation.
Power cord with wall transformer	The transformer plugs into a standard wall outlet to provide power to the analyzer.
IBM-compatible personal computer (PC).	The computer lets you control the analyzer, and displays all prompts and test results.
Serial port interface cable	You'll use this cable to connect the Signature 5000 to your personal computer.
Test adapter with 22 K ohm resistance <b>Note:</b> Adapters with 100 K ohm resistance have been built as special-order items.	This is the test adapter you'll connect to the analyzer as you go through the performance verification procedure. 
Cirris Signature 5000 Performance Verification Manual.	This is the manual you're reading.

## How to Set Up for the Performance Verification Test

---

**When to use** Use this procedure to set your Cirris Signature 5000 system up for performance verification testing.

---

**Important!** This procedure applies to a one-box Signature 5000 system. If your system has more than one box, you must verify the operation of each box separately.

---

### Procedure

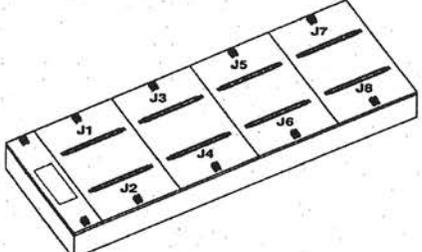

Step	Action/Explanation
1	Turn on your personal computer (PC).
2	Connect the Signature 5000 to your personal computer using the serial port interface cable.  <b>Note:</b> You should connect one end of the serial interface cable to your computer's serial port. Connect the other end of the cable to the port on the back of the Signature 5000 marked "TO PC SERIAL PORT OR NEXT LOWER BOX."
3	Connect the terminator to the Signature 5000.
4	Plug the wall transformer into a standard outlet, and the power cord into the Signature 5000.
5	Place the floppy disk containing the 5000 system software in the floppy disk drive, then load the software by typing <b>SIG Enter</b> at the DOS prompt.

---

# How to Begin the Performance Verification (Test for No Connections)

**When to use** Use this procedure to make certain that the test points in your Signature 5000 have no unintended connections between them.

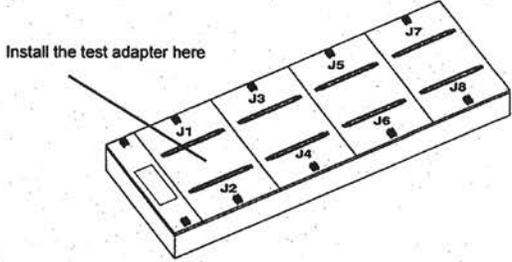

## Procedure

Step	Action/Explanation						
1	<p>Remove all adapters (and any other connections) from the connectors on the Signature 5000.</p>  <p><b>Important!</b> Make sure that no adapters are installed in the 5000.</p>						
2	<p>Select "LEARN W.LIST" from the submenu on the computer screen.</p> <table border="1" data-bbox="803 1318 1323 1501"> <thead> <tr> <th data-bbox="803 1318 1063 1375">If</th> <th data-bbox="1063 1318 1323 1375">then</th> </tr> </thead> <tbody> <tr> <td data-bbox="803 1375 1063 1438">the computer displays <b>NO CONNECTS</b></td> <td data-bbox="1063 1375 1323 1438">the Signature 5000 passes this test.</td> </tr> <tr> <td data-bbox="803 1438 1063 1501">the computer displays anything else</td> <td data-bbox="1063 1438 1323 1501">your Signature 5000 needs service.</td> </tr> </tbody> </table>	If	then	the computer displays <b>NO CONNECTS</b>	the Signature 5000 passes this test.	the computer displays anything else	your Signature 5000 needs service.
If	then						
the computer displays <b>NO CONNECTS</b>	the Signature 5000 passes this test.						
the computer displays anything else	your Signature 5000 needs service.						

# How to Begin the Verification Test (J1 and J2)

**When to use** Use this procedure to verify operation of the 5000 at connector position J1 J2.

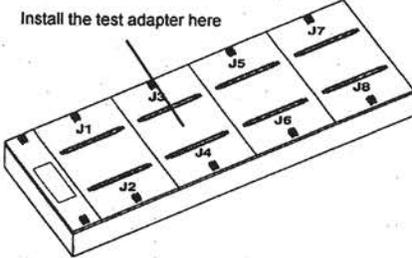

## Procedure

Step	Action/Explanation						
1	<p>Install the test adapter at connector positions J1 and J2 on the analyzer as indicated.</p> <p><b>Important!</b> Be sure to orient the adapter so that J1 on the adapter is plugged into J1 on the 5000.</p> 						
2	<p>Select "LEARN W.LIST" from the submenu on the computer screen.</p> <p><b>Result:</b></p> <table border="1" data-bbox="766 1251 1279 1430"> <thead> <tr> <th data-bbox="766 1251 1024 1306">If</th> <th data-bbox="1024 1251 1279 1306">then</th> </tr> </thead> <tbody> <tr> <td data-bbox="766 1306 1024 1367">the computer displays the signature 2DAE40</td> <td data-bbox="1024 1306 1279 1367">the Signature 5000 passes this test.</td> </tr> <tr> <td data-bbox="766 1367 1024 1430">the computer displays any other signature</td> <td data-bbox="1024 1367 1279 1430">your Signature 5000 needs service.</td> </tr> </tbody> </table>	If	then	the computer displays the signature 2DAE40	the Signature 5000 passes this test.	the computer displays any other signature	your Signature 5000 needs service.
If	then						
the computer displays the signature 2DAE40	the Signature 5000 passes this test.						
the computer displays any other signature	your Signature 5000 needs service.						

# How to Begin the Verification Test (J3 and J4)

**When to use** Use this procedure to verify operation of the 5000 at connector positions J3 and J4.

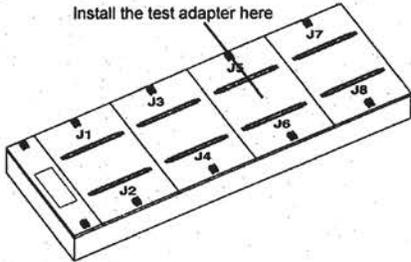

## Procedure

Step	Action/Explanation						
1	<p>Install the test adapter at connector positions J3 and J4 on the analyzer as indicated.</p> <p><b>Important!</b> Be sure to orient the adapter so that J1 on the adapter is plugged into J3 on the analyzer.</p> 						
2	<p>Select "LEARN W.LIST" from the submenu on the computer screen.</p> <p><b>Result:</b></p> <table border="1" data-bbox="797 1226 1312 1409"> <thead> <tr> <th data-bbox="797 1226 1052 1283">if</th> <th data-bbox="1052 1226 1312 1283">then</th> </tr> </thead> <tbody> <tr> <td data-bbox="797 1283 1052 1346">the computer displays the signature 89874E</td> <td data-bbox="1052 1283 1312 1346">the Signature 5000 passes this test.</td> </tr> <tr> <td data-bbox="797 1346 1052 1409">the computer displays any other signature</td> <td data-bbox="1052 1346 1312 1409">your Signature 5000 needs service.</td> </tr> </tbody> </table>	if	then	the computer displays the signature 89874E	the Signature 5000 passes this test.	the computer displays any other signature	your Signature 5000 needs service.
if	then						
the computer displays the signature 89874E	the Signature 5000 passes this test.						
the computer displays any other signature	your Signature 5000 needs service.						

# How to Begin the Verification Test (J5 and J6)

**When to use** Use this procedure to verify operation of the 5000 at connector positions J5 and J6.

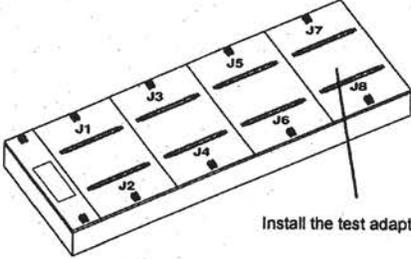

## Procedure

Step	Action/Explanation						
1	<p>Install the test adapter at connector positions J5 and J6 as indicated.</p> <p><b>Important!</b> Be sure to orient the adapter so that J1 on the adapter is plugged into J5 on the analyzer.</p> <div style="text-align: center;">  </div>						
2	<p>Select "LEARN W.LIST" from the submenu on the computer screen.</p> <p><b>Result:</b></p> <table border="1" data-bbox="769 1268 1281 1446"> <thead> <tr> <th data-bbox="769 1268 1024 1325">If</th> <th data-bbox="1024 1268 1281 1325">then</th> </tr> </thead> <tbody> <tr> <td data-bbox="769 1325 1024 1388">the computer displays the signature 1852F0</td> <td data-bbox="1024 1325 1281 1388">the Signature 5000 passes this test.</td> </tr> <tr> <td data-bbox="769 1388 1024 1446">the computer displays any other signature</td> <td data-bbox="1024 1388 1281 1446">your Signature 5000 needs service.</td> </tr> </tbody> </table>	If	then	the computer displays the signature 1852F0	the Signature 5000 passes this test.	the computer displays any other signature	your Signature 5000 needs service.
If	then						
the computer displays the signature 1852F0	the Signature 5000 passes this test.						
the computer displays any other signature	your Signature 5000 needs service.						

# How to Begin the Verification Test (J7 and J8)

**When to use** Use this procedure to verify operation of the 5000 at connector positions J7 and J8.

## Procedure

Step	Action/Explanation						
1	<p>Install the test adapter at connector positions J7 and J8 as indicated.</p> <p><b>Important!</b> Be sure to orient the adapter so that J1 on the adapter is plugged into J7 on the analyzer.</p> 						
2	<p>Select "LEARN W.LIST" from the submenu on the computer screen.</p> <p><b>Result:</b></p> <table border="1" data-bbox="773 1266 1287 1446"> <thead> <tr> <th data-bbox="773 1266 1029 1325">If</th> <th data-bbox="1029 1266 1287 1325">then</th> </tr> </thead> <tbody> <tr> <td data-bbox="773 1325 1029 1388">the computer displays the signature 677C81</td> <td data-bbox="1029 1325 1287 1388">the Signature 5000 passes this test.</td> </tr> <tr> <td data-bbox="773 1388 1029 1446">the computer displays any other signature</td> <td data-bbox="1029 1388 1287 1446">your Signature 5000 needs service.</td> </tr> </tbody> </table>	If	then	the computer displays the signature 677C81	the Signature 5000 passes this test.	the computer displays any other signature	your Signature 5000 needs service.
If	then						
the computer displays the signature 677C81	the Signature 5000 passes this test.						
the computer displays any other signature	your Signature 5000 needs service.						

## How to Complete the Verification (J1 and J2)

**When to use** Use this procedure to complete performance verification at connector positions J1 and J2.

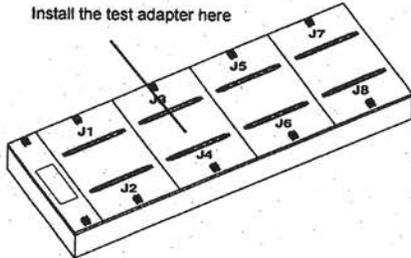

### Procedure

Step	Action/Explanation						
1	<p>Install the test adapter at connector positions J1 and J2 as indicated.</p> <p><b>Important!</b> Be sure to orient the adapter so that J-1 on the test adapter is plugged into J2 on the analyzer.</p> <div data-bbox="824 787 1230 1045" style="text-align: center;"> <p>Install the test adapter here</p> </div>						
2	<p>Select "LEARN W.LIST" from the submenu on the computer screen.</p> <p><b>Result:</b></p> <table border="1" data-bbox="777 1285 1286 1461" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th data-bbox="784 1293 1029 1339">If</th> <th data-bbox="1029 1293 1279 1339">then</th> </tr> </thead> <tbody> <tr> <td data-bbox="784 1339 1029 1398">the computer displays the signature 86FD14</td> <td data-bbox="1029 1339 1279 1398">the Signature 5000 passes this test.</td> </tr> <tr> <td data-bbox="784 1398 1029 1457">the computer displays any other signature</td> <td data-bbox="1029 1398 1279 1457">your Signature 5000 needs service.</td> </tr> </tbody> </table>	If	then	the computer displays the signature 86FD14	the Signature 5000 passes this test.	the computer displays any other signature	your Signature 5000 needs service.
If	then						
the computer displays the signature 86FD14	the Signature 5000 passes this test.						
the computer displays any other signature	your Signature 5000 needs service.						

## How to Complete the Verification (J3 and J4)

**When to use** Use this procedure to complete performance verification at connector positions J3 and J4.

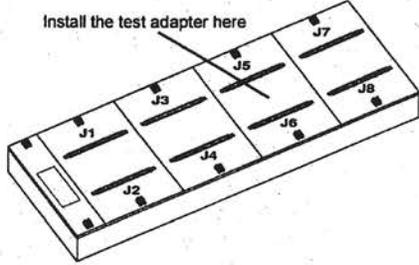

### Procedure

Step	Action/Explanation						
1	<p>Install the test adapter at positions J3 and J4 as indicated.</p> <p><b>Important!</b> Be sure to orient the adapter so that J1 on the test adapter is plugged into J4 on the analyzer.</p> <div style="text-align: center;"> <p>Install the test adapter here</p>  </div>						
2	<p>Select "LEARN W.LIST" from the submenu on the computer screen.</p> <p><b>Result:</b></p> <table border="1" data-bbox="751 1276 1265 1461"> <thead> <tr> <th data-bbox="751 1276 1008 1333">If</th> <th data-bbox="1008 1276 1265 1333">then</th> </tr> </thead> <tbody> <tr> <td data-bbox="751 1333 1008 1398">the computer displays the signature 011394</td> <td data-bbox="1008 1333 1265 1398">the Signature 5000 passes this test.</td> </tr> <tr> <td data-bbox="751 1398 1008 1461">the computer displays any other signature</td> <td data-bbox="1008 1398 1265 1461">your Signature 5000 needs service.</td> </tr> </tbody> </table>	If	then	the computer displays the signature 011394	the Signature 5000 passes this test.	the computer displays any other signature	your Signature 5000 needs service.
If	then						
the computer displays the signature 011394	the Signature 5000 passes this test.						
the computer displays any other signature	your Signature 5000 needs service.						

## How to Complete the Verification (J5 and J6)

**When to use** Use this procedure to complete performance verification at connector positions J5 and J6.

### Procedure

Step	Action/Explanation						
1	<p>Install the adapter at positions J5 and J6 as indicated.</p> <p><b>Important!</b> Be sure to orient the adapter so that J1 on the test adapter is plugged into J6 on the analyzer.</p> 						
2	<p>Select "LEARN W.LIST" from the submenu on the computer screen.</p> <p><b>Result:</b></p> <table border="1" data-bbox="782 1289 1305 1470"> <thead> <tr> <th data-bbox="789 1297 1042 1352">if</th> <th data-bbox="1042 1297 1305 1352">then</th> </tr> </thead> <tbody> <tr> <td data-bbox="789 1352 1042 1407">the computer displays the signature F6CC8F</td> <td data-bbox="1042 1352 1305 1407">the Signature 5000 passes this test.</td> </tr> <tr> <td data-bbox="789 1407 1042 1461">the computer displays any other signature</td> <td data-bbox="1042 1407 1305 1461">your Signature 5000 needs service.</td> </tr> </tbody> </table>	if	then	the computer displays the signature F6CC8F	the Signature 5000 passes this test.	the computer displays any other signature	your Signature 5000 needs service.
if	then						
the computer displays the signature F6CC8F	the Signature 5000 passes this test.						
the computer displays any other signature	your Signature 5000 needs service.						

## How to Complete the Verification (J7 and J8)

**When to use** Use this procedure to complete performance verification at connector positions J7 and J8.

### Procedure

Step	Action/Explanation						
1	<p>Install the test adapter at connector positions J7 and J8 as indicated.</p> <p><b>Important!</b> Be sure to orient the adapter so that J1 on the test adapter is plugged into J-8 on the analyzer.</p> <div data-bbox="813 814 1235 1079" style="text-align: center;"> </div>						
2	<p>Select "LEARN W.LIST" from the submenu on the computer screen.</p> <p><b>Result:</b></p> <table border="1" data-bbox="773 1304 1295 1486" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th data-bbox="773 1304 1036 1360">If</th> <th data-bbox="1036 1304 1295 1360">then</th> </tr> </thead> <tbody> <tr> <td data-bbox="773 1360 1036 1423">the computer displays the signature 85EDF2</td> <td data-bbox="1036 1360 1295 1423">the Signature 5000 passes the test.</td> </tr> <tr> <td data-bbox="773 1423 1036 1486">the computer displays any other signature</td> <td data-bbox="1036 1423 1295 1486">your Signature 5000 needs service.</td> </tr> </tbody> </table>	If	then	the computer displays the signature 85EDF2	the Signature 5000 passes the test.	the computer displays any other signature	your Signature 5000 needs service.
If	then						
the computer displays the signature 85EDF2	the Signature 5000 passes the test.						
the computer displays any other signature	your Signature 5000 needs service.						

## Conclusion

---

**Did your analyzer  
pass or fail?**

<b>if</b>	<b>then</b>
the Signature 5000 <i>passed</i> all of the tests in the series you've performed	your analyzer is operating properly. You can proceed to test cables as usual.
the Signature 5000 <i>failed</i> any of the tests in the series you've performed	your Signature 5000 needs service.

---

**Does your Signature  
5000 need service?**

If you find that your Cirris Signature 5000 needs service, you should contact us at (801) 973-4600 or (800) 441-9910. If you'd like to reach us by fax, dial (801) 973-4609.
